As the world's leading and most diverse derivatives marketplace, CME Group ([www.cmegroup.com](http://www.cmegroup.com)) enables clients to trade futures, options, cash and OTC markets, optimize portfolios, and analyze data – empowering market participants worldwide to efficiently manage risk and capture opportunities. CME Group exchanges offer the widest range of global benchmark products across all major asset classes based on interest rates, equity indexes, foreign exchange, energy, agricultural products and metals. The company offers futures and options on futures trading through the CME Globex® platform, fixed income trading via BrokerTec and foreign exchange trading on the EBS platform. In addition, it operates one of the world's leading central counterparty clearing providers, CME Clearing. With a range of pre- and post-trade products and services underpinning the entire lifecycle of a trade, CME Group also offers optimization and reconciliation services through TriOptima, and trade processing services through Traiana.

Eurex is part of Deutsche Börse Group and the marketplace of choice for the global derivatives community, delivering innovation and excellence across the financial industry's value spectrum. We offer a broad range of international benchmark products and operate the most liquid fixed income markets in the world. More than 350 Eurex members in 33 countries and close to 7,000 registered traders are connected. Trading volume at Eurex exceeds 1.8 billion contracts a year, making it the market place of choice for the derivatives community worldwide. Since 10 December 2018, Eurex offered extended trading hours for select liquid futures to support the increasing demand of Eurex clients for trading on a global market place. As of October 2019, we have reached a record of more than 6 million accumulated contracts traded during Asian trading hours.

We are working with customers, regulators and all our other stakeholders to facilitate an efficient and diverse market, delivering safety and integrity providing maximum benefits to all participants. We adapt to the ever-changing environment with a growing portfolio of products from pre- to post-trading. All grounded in robust risk management solutions and proven technology.

Our strong asset class focus combines of sales and product design functions for equity index and for fixed income derivatives, respectively. Bundling exchange-traded and OTC products under individual asset class leadership enables Eurex to further strengthen its holistic product and service offering, especially as the regulatory agenda seeks to shift standardised OTC business on exchange and to clearing.

# Extended trading hours. Extended opportunities.

In December 2018, Eurex extended its trading hours for a select group of liquid futures, including EURO STOXX 50®, DAX®, Mini-DAX®, Euro-Bund, Euro-Bobl, Euro-Schatz, Euro-Buxl® and all MSCI futures. The market now opens at 8.00 a.m Singapore time.

Trading during these extended hours has already passed the 6 million mark, proving its success and deep liquidity.

Benefit from extra time to hedge, unlock the potential of cross-market opportunities and diversify your portfolio.

Trade Eurex global benchmark futures in the Asia time zones.
