Test Description	Firms will submit dummy orders for pre-determined products to the Montreal Exchange (MX). MX will validate the receipt of these orders as defined in the transaction acknowledgement protocol field below. - MX participants can use the following protocols for order entry: FIX, SAIL - Market data will be disseminated via multicast HSVF & OBF feeds. - Also available for testing – ATR, Drop Copy, TMS, Clearing API, MX SFTP server (EOD and PAR Reports), LOPR Trade data will flow through from MX to CDCC's SOLA® Clearing system (Connectivity – trade processing for clearing), Within CDCS' Disaster Recovery (DR) environment, Clearing Members would be able to enter the system following authentication and visualize trades. Please note that the CDCC reports reflecting DR clearing activities will be provided following the end-of-day batch of Monday, October 26, 2026 As access to the CDCC Secured FTP (sFTP) Server will be available, CDCC would request that Clearing Members attempt to access the latter in a DR-mode and advise CDCC staff if their file directory was readily accessible (Clearing Members can send an email to cdcc-ops@tmx.com). CDCC also requests that any Clearing Members that are FIXML-enabled test their access to the FIXML real-time feed and/or download the FIXML End-of-Day files found on the SFTP Server, both of which will be in a DR mode, Members are requested to include the outcome of their FIXML testing in their test result confirmations to cdcc-ops@tmx.com. CDCC would also like to request for all members that submit Position Declaration Files (PCS & GCM) to test their processes in DR-mode accordingly. This includes any FIXML-based uploads via SFTP (if applicable), CSV uploads into CDCC's SOLA®

	Clearing system (if applicable), or manual position adjustments done via CDCC’s SOLA® Clearing system. Members are also requested to include the results of their Position Declaration File testing in their test result confirmations to cdcc-ops@tmx.com .
